Claim Rejections - 35 USC § 112

1. Claims 9 and 10 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Please note that claim 9 had the same deficiency as claim 8 regarding the phrase "such as". It is unclear whether or not the groove or ribs are indeed limitations in the claim.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

3. Claims 1-28 are rejected under 35 U.S.C. 102(e) as being anticipated by Bommer et al.

Bommer et al. shows a pump 2; body 7, 8; piston 17; fixing ring 6; reservoir 3; sealing gasket 22, 23; air intake passage/through bore/vent hole 33 that is always open; filtration element 21 that forms part of an air passage between top edge 9 and fixing ring 6; ferrule 7; top edge 9; and air passage 34 formed by flange/groove in the ferrule, the passage is cut off when the dispenser is in the rest position as seen in Figure 2.

Response to Arguments

4. Applicant's arguments filed June 10, 2004 have been fully considered but they are not persuasive. Applicant contends that the top edge of the shell doesn't contribute to house the filter unit in Bommer et al. However, the claims only require that the filtration unit be disposed between the top edge and the fixing ring. As clearly seen in the Figures the filtration unit 21 is disposed between top edge 9 and fixing ring 6; thereby meeting the claimed limitation.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

Art Unit: 3754

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
